Queers in History

The Comprehensive Encyclopedia of Historical Gays, Lesbians and Bisexuals

KEITH STERN

*Queers in History* is the only comprehensive biographical compendium of important historical and contemporary figures who were/are gay, lesbian, bisexual or transgender. From Egyptian pharaohs, Catholic popes and Abraham Lincoln to Bishop Gene Robinson, Neil Patrick Harris and Angelina Jolie, *Queers in History* brings these figures, from their work to their sexuality, to life.

The hundreds of people whose stories appear in this book are some of the most intriguing personalities of their times: actors and actresses, writers and musicians, businessmen and politicians, scientists and soldiers. But this irresistibly readable encyclopedia doesn’t just report those details that get left out of the standard biographies; it reveals a fascinating picture of queer society and culture throughout recorded history, from the homosexual shudō tradition practiced by samurai in Japan to the modern struggles for equal rights in America. Sir Ian McKellen contributes the foreword.

This is history at its finest: surprising, absorbing and ultimately empowering.

SUSAN GREEN & RANDEE DAWN

Featuring interviews with your favorite Law & Order: SVU insiders, this guide offers a behind-the-scenes view of the popular crime show

Law & Order: Special Victims Unit is a spin-off of the original Law & Order series and is the highest-rated show of the Law & Order franchise. The show portrays sex crimes from the perspective of NYPD detectives and prosecutors. With the sort of ripped-from-the-headlines approach fans expect from the Law & Order franchise, SVU offers a gritty look at how justice works and when it unfortunately does not.

The Law & Order: Special Victims Unit Unofficial Companion is a comprehensive guide covering all 10 seasons (including the current 2008–2009 season) and includes a synopsis and an objective analysis for each episode, as well as commentaries or recollections from the people involved in crafting the one-hour tale. It goes after the heart of SVU through interviews with actors, writers, producers, casting agents, location scouts and others. Moreover, the authors peek behind the scenes of the bicoastal operation, observing the progress of an entire episode shot in New York City and a script fine-tuned in Los Angeles. The book will delight SVU devotees who love on-screen and backstage trivia. In addition, creator Dick Wolf offers readers a gripping foreword to the book.

Fake Alibis
An Almost True Novel
FRANK SIBILA WITH ADAM-TROY CASTRO AND CAREN KENNEDY

Fake Alibis is a gut-busting novel about making a living out of deception, based on the real-life adventures of the creator of the wildly successful company, FakeAlibi.com

When Keith wants to keep his wife from finding out about a beautiful 20-something redhead, he calls the only person who he knows can find the perfect cover for him—Frank Sibila, a man whose clientele ranges from cheating housewives to diplomats with their political livelihoods at stake. Holed up in the men’s room, a panicked Keith explains to Frank that his wife has just shown up at the restaurant where he and the redhead are dining. Frank assures him he will be there in 10 minutes. What Frank doesn’t know is that 10 minutes from now, his already drama-packed life will get even more interesting.

Keith’s case should be business as usual ... nothing out of the ordinary for the owner and operator of FakeAlibi.com, the real-life Web service that vouches for your “perfectly innocent” whereabouts. A master at the art of cock-and-bull storytelling, Frank twists believable tales to exonerate clients around the world, which he fortifies with agent testimony, receipts, fake news stories and whatever else is needed to tidy up his clients’ messes and moral missteps.

In this hilarious novel inspired by his real-life exploits, Frank finds himself trapped between a hapless husband who has run into big trouble in Sin City and an implacable wronged woman determined to cause Frank grief. It’s all just another day at the office for Frank and his slick operatives ... until he misplaces his client.

The Accidental Millionaire

How to Succeed in Life Without Really Trying

GARY FONG

The Accidental Millionaire is the memoir of Gary Fong, would-be slacker who revolutionized wedding photography, inventor of popular photography aids, entrepreneur, contrarian, bon vivant and a man who really, really, didn’t want to become a doctor. A first-generation Chinese-American, Gary was raised in one of Los Angeles’ least-desirable neighborhoods and was forced to deal—in his own quirky and often very funny way—with the burdens of poverty, crime and his parents’ relentless aspirations. These almost overwhelmed him until he had a dramatic epiphany. Spotting a bumper sticker that read “Since I gave up hope, I feel much better,” Gary promptly did just that.

He stopped trying and started succeeding. At turns hilarious, insightful and instructive, The Accidental Millionaire is Horatio Alger—meets—David Sedaris. Turning the traditional self-help principles upside down, The Accidental Millionaire disdains the goal-oriented approaches of traditional self-help philosophies. Sometimes not knowing where you are going is the best possible way to get there.

GARY FONG is a globally renowned photographer, inventor and entrepreneur. He is the father of “story-booking,” now the industry standard in wedding photography, in which candid shots are arranged in real time to tell a story, as opposed to the archaic method of taking posed, stilted shots. He is also the inventor of the Lightsphere, a specially colored dome that is held in place over the flash unit of a camera.
From The Accidental Millionaire:

I credit two very small events in my life, separated by many years, for changing my life. One occurred when I was 10 years old. I wrote in my journal, with oddly grown-up clarity, that I was going to become my own parent. I was no longer going to derive my sense of safety and wellbeing from Mom and Dad. I simply realized that they would never be able to provide it. This journal entry then became a mandate to take complete responsibility for my life's direction.

The second moment occurred when, as a grown man, I glanced at a bumper sticker on a car. I was stuck in heavy L.A. traffic, feeling utterly frustrated with the fact that my life was not going according to Plan, mired in the depths of apathy and frustration, when I saw nine little words on the rear window of a Subaru wagon. Instantly, and I do mean instantly, my perspective changed.

The bumper sticker said, “Since I gave up hope, I feel much better.” I read it, laughed myself sick and immediately felt the proverbial weight of the world lift from my shoulders.

In that one instant, I gave up all attachment to things going the way I wanted them to. Ever. I surrendered all of my goals, my visions, my fantasies, my expectations. My Plans. I was suddenly knocked from my inner railroad tracks and felt my perspective opening up like a morning glory in the sun.

That bumper sticker gave me my freedom.

Bride and groom stood at the bottom of this stage, not looking at one another, emitting waves of hostility so thick you could feel them in the back row. After the rabbi said a few words, the two of them were supposed to go up the stairs together, to stand under the covered Chuppah for the balance of the ceremony. As they ascended the six steps, the groom accidentally stepped on the bride’s veil. Her head jerked backward.

She started screaming at the groom, “You fucking idiot. Why are you always so stupid? Do you take pills for it?” To which he replied, “I only stepped on your veil. Sor-ry!” She wouldn’t let it drop there. “You’re going to wreck my hair! You’re going to wreck my hair! Is that what you want?” And what was Mr. Right’s response? He reached over and yanked her veil off, uncoiling her carefully coiffed hair. The hair she had agonized over in the magical mirror. He just pulled the veil off and threw it on the ground. Her hair stuck out in 37 directions. She looked like a cactus.

“That’s what I think of your veil,” he said.

A New Dawn

Your Favorite Authors on Stephenie Meyer’s Twilight Series: Completely Unauthorized

ELLEN HOPKINS

A fascinating, highly entertaining journey through the Twilight series that devoted readers won’t want to miss.

Edited by bestselling author Ellen Hopkins, A New Dawn is packed with the same debates readers engage in with friends: Should Bella have chosen Edward or Jacob? How much control do Meyer’s vampires and werewolves really have over their own lives? The collection also goes further: Is Edward a romantic or a (really hot) sociopath? How do the Quileute werewolves compare to other Native American wolf myths? What does the Twilight series have in common with Shakespeare? With contributions from Megan McCafferty, Cassandra Clare, Rachel Caine and many more, A New Dawn answers these questions and more for a teen (and adult!) audience hungry for clever, view-changing commentary on their favorite series.

LEAH WILSON

A scintillating collection of essays on the #1 New York Times bestselling Anita Blake, Vampire Hunter series

Laurell K. Hamilton’s Anita Blake, Vampire Hunter series is a literary sensation, thanks to its strong female hero, well-fleshed (both literally and literarily) characters and unabashed attitude toward sex. The world Hamilton has created is powerfully compelling and stunningly complex—and it gets deeper and richer, and more perilous, with every book.

Straddling the series’ dominant themes of sex and power, Ardeur gives Anita fans a deeper look into the dynamics, both personal political, that have kept readers fascinated throughout the run of the series. Why is the ardeur the very best thing that could have happened to Anita, personally (aside from all the sex it requires her to have with hot men)? How is Anita’s alternate United States a logical legal extension of our own? And as the series continues, what other bargains might Anita have to make with herself and others in order to keep the people she loves safe from harm?

The Great American Heart Hoax
Livesaving Advice Your Doctor Should Tell You About Heart Disease Prevention (But Probably Never Will)

MICHAEL OZNER, MD

A renowned cardiologist shows the way to heart health without stents or surgery

Clinical studies show that cardiovascular intervention does not prevent heart attacks or prolong life in stable patients with coronary artery disease ... so why are more than 1.5 million angioplasties and coronary bypass surgeries done annually in the United States alone? In *The Great American Heart Hoax*, esteemed cardiologist Michael Ozner, author of *The Miami Mediterranean Diet*, reveals groundbreaking truths about what actually helps prevent and reverse heart disease and what isn’t worth the money or risk.

Discover disturbing realities from a cardiologist about the billion-dollar cardiovascular intervention industry. While a minority of patients may benefit from surgery, Ozner uncovers that the majority can employ much simpler methods, such as diet, exercise and medical therapy, to achieve better results—without stents or surgery. Most important, *The Great American Heart Hoax* provides a 10-step program to improve your heart health and reduce your risk of heart disease.

MICHAEL OZNER, MD, FACC, FAHA, is one of America’s leading advocates for heart disease prevention. Ozner is a board-certified cardiologist, a Fellow of the American College of Cardiology and of the American Heart Association and medical director of Wellness & Prevention at Baptist Health South Florida. The Stem Cell Miracle

The Healing Secret From Medicine’s Future That’s Saving Lives Today

WILLIAM C. RADER, MD

For decades you’ve been told that stem cells have the potential to improve the health of millions, cure a wide range of diseases and revolutionize medical science … someday. You’ve been told that it would take decades of work with mice before, in some far-off day, we could begin human trials. But if, as most scientists agree, stem cells have this incredible potential, shouldn’t we be doing everything we can to bring this technology to those suffering, right now?

Fortunately for all of us, Dr. William Rader felt the same way.

If you thought the time of medical breakthroughs was over, brace yourself for the untold story of a doctor who singlehandedly, in the face of disdain from his colleagues and threats from government bureaucrats, made a breakthrough scientific discovery. Dr. Rader discovered how to apply fetal stem cell technology to humans and has saved the lives and eased the suffering of more than 1,500 patients since 1995.

Dr. Rader, familiar to millions as a respected medical expert on ABC-TV, reveals the astounding truth about the most extensive fetal stem cell trials ever conducted on human patients—mostly so-called “hopeless” cases.

Now, the truth can be told, and it reads like an adventure story, spanning three continents as one doctor dared to defy the FDA, the medical establishment and the drug companies.

MARKETING

• Traditional marketing to book trade, magazines (health, news), newspapers, broadcast (television/radio) and online outlets

OF NOTE

• The author has co-hosted and been a guest on several television talk shows
• In addition to his Naval Commendation, Dr. Rader is the recipient of the Sandoz Award (first in his psychiatric residency class, USC, 1971), and has received awards from Overeaters Anonymous (Man of the Year, 1982) and the National Council of Alcoholism

WILLIAM C. RADER, MD, is the only American physician involved in the actual clinical application of human fetal stem cells. Over the past 12 years, he has successfully treated more than a thousand patients.

Dr. Rader earned his medical degree with honors from the State University of New York at Buffalo in 1967 and was first in his psychiatric residency class at the University of Southern California Medical Center in 1971.

For more than a decade, Dr. Rader was one of the first national medical experts on
For the first time, a doctor reveals the dramatic details of more than 1,500 successful stem cell treatments, many on patients considered “hopeless” cases.

“I wasn’t interested in waiting for the results of endless experiments on mice after what I had learned,” Rader said. Even after Dr. Rader’s proven multiple successes in treating patients suffering from brain damage, cancer, Alzheimer’s, multiple sclerosis, epilepsy, AIDS, stroke, autism, spinal cord injury, cerebral palsy, down syndrome and numerous other major afflictions, the FDA and the medical establishment fought him with intimidation tactics and threats of serious repercussions. But Bill Rader never quit.

“They called me arrogant, impulsive and out of control. They said my results were fallacious because I did not follow the scientific method, which includes double-blind studies. I refused to do double-blind studies; giving one child who had a terminal illness a placebo and another fetal stem cells, knowing that I had successfully treated their disease in the past, would, to me, be tantamount to murder. In my experience, ignoring convention can bring new information and sometimes even remarkable results. They accused me of shooting in the dark—but I never shot from the hip. After over a year of due diligence in various parts of the world including China, I understood what I was about to do. I just had to discover the exact method of actualizing it. And today the results—my patients—speak for themselves!”

*The Stem Cell Miracle* reveals the science behind Dr. Rader’s breakthroughs, the struggles with the medical establishment and, most important, the detailed results of his work with many hundreds of patients. Dr. Rader is ready—in fact anxious—with this book, to share his technologies and results with everyone, including the medical establishment. After more than 1,500 successful treatments, he believes this lifesaving technology should be available to the general public. Don’t you agree?

Startling Implications for Diet, Weight Loss and Long-term Health

T. COLIN CAMPBELL, PHD, AND THOMAS M. CAMPBELL II

Even today, as new fad diets sweep the nation, two-thirds of adults are still obese and children are being diagnosed with Type 2 diabetes, typically an “adult” disease, at an alarming rate. If we’re eating healthier, why are Americans stricken with heart disease as often as we were 30 years ago?

In The China Study, T. Colin Campbell, PhD, details the connection between nutrition and heart disease, diabetes and cancer, as well as nutrition’s ability to reduce or reverse the risk or effects of these deadly illnesses. Campbell also examines the source of nutritional confusion produced by powerful lobbies, government entities and opportunistic scientists. The New York Times has recognized the study as the “Grand Prix of epidemiology” and the “most comprehensive large study ever undertaken of the relationship between diet and the risk of developing disease.”

The China Study is not a diet book. Consumers are bombarded with conflicting messages regarding health and nutrition; the market is flooded with popular titles about programs such as the Atkins Diet and the South Beach Diet. Dr. Campbell cuts through the haze of misinformation and delivers an insightful message to anyone living with cancer, diabetes, heart disease or obesity, and those concerned with the effects of aging. Additionally, he challenges the validity of low-carb fad diets and issues a startling warning to their followers.
