Rock Your Business

What You and Your Company Can Learn from the Business of Rock and Roll

DAVID FISHOF WITH MICHAEL LEVIN

Would you like your business ...
... to burst into public awareness like Lady Gaga?
... to have the long-lived success of Mick Jagger?
... to demonstrate the creativity of The Beatles?

We don’t normally think of the music business as a source of entrepreneurial insight, but we should. The best bands have longevity, a depth of customer loyalty, and a level of profitability that puts most businesses to shame. And what they know—about marketing, partnerships, the power of bartering, and overcoming obstacles—isn’t taught in any business school.

David Fishof has lived at the center of the music business for more than 25 years. From his early successes in reuniting The Monkees and convincing Ringo Starr to launch his All Starr tour, to his current mega-success as founder and CEO of Rock ‘n’ Roll Fantasy Camp™, Fishof has learned from the leading minds in the music business—and has applied this learning in one entrepreneurial venture after another. Filled with insights from Fishof’s amazing exploits in the music industry and seasoned with business tips from music legends, Rock Your Business provides important and original business insights from an unlikely source—the world of rock and roll.

OF NOTE
- Rock ‘n’ Roll Fantasy Camp™ currently has a reality series (made in conjunction with Mark Burnett Productions) running on VH1 Classic
- The following media have all published stories on Rock ‘n’ Roll Fantasy Camp™: People, The Wall Street Journal, Bloomberg Businessweek, Entertainment Weekly, Reuters, USA TODAY, New York Post, Los Angeles Times, Fortune, Q, InStyle, More, Money, Telegraph Magazine, Travel + Leisure, GQ, Rolling Stone, Forbes.com, and many more
- Ads for Rock Your Business will run in People from August to October

Due to his original, successful, and exciting live shows over the past 25 years, DAVID FISHOF has earned a reputation as one of the most creative and innovative entertainment producers in the world. After years of producing rock tours across the globe, Fishof created Rock ‘n’ Roll Fantasy Camp™, which gives music fans the once-in-a-lifetime opportunity to live like rock stars and jam with their idols. Over the years, Fishof has brought some of the world’s top rockers to Rock ‘n’ Roll Fantasy Camp™—Bill Wyman, Bret Michaels,
That night in the wee hours at the hotel is when it hit me. I couldn’t be the only one who felt this way about The Monkees. So why not reunite them, and let people relive this great feeling from their youth, while at the same time introducing them to a new generation? ... I bought the name [The Monkees] for $3,500, no royalty.

It was rough going once I set out to get the band back together. No one was sure that we would be able to sell the shows. Then one day I was sitting in my office and Jim Bessman, a reporter from Billboard, came in and said, “Hey, MTV just announced that they’re going to air The Monkees TV series for more than 24 straight hours.” I immediately ran upstairs to the seventh floor of my building, where Bob Pittman and Tom Freston, the MTV top executives, happened to have their offices. Bob suggested we help each other out—I would promote his brand if he promoted mine. So he promoted The Monkees tour, and I promoted his new fledgling network, MTV, in my advertisements.

When the tour got started, it was amazing. The MTV airing of The Monkees TV show helped create that success. This new fledgling network decided to air the first video band, The Monkees—and people didn’t know that it was 20 years old! They thought it was new. So when we put the tickets on sale, we got all these screaming young girls. They’d come home at 10 in the morning and their mothers would say, “Where have you been all night?” And the daughter would say, “I was waiting in line to buy Monkees tickets!” And then the mothers would say, “Wait a minute, I want to go too!” So the first 20 rows of the concerts were these young girls, and in the back, you would see all these mothers. It was a truly cross-generational concert.

The Monkees ended up being the biggest tour I’ve ever produced. All the executives who were behind the Monkees prospered like crazy. Rhino Records really launched after The Monkee TV shows—they reissued six of The Monkees’ old albums, which landed on the Top 50 Album sales charts. Rhino eventually sold for a $100 million to Warner, and I bet The Monkees contributed to some of that money. Arista Records released a “Greatest Hits,” with three new songs that went on to sell millions. And the executives at Clive Davis’s Arista record label went on to become presidents of four labels. It was amazing—this one great concert and band idea kick-started so many careers.

Popular blogger and columnist for major national publications shows truths and inspirations for today’s black women

It’s time for a redefinition among black women in America.

In its 2011 hardcover release, Black Woman Redefined was a top-selling book and took home a 2011 Best Non-Fiction Book of the Year Award from the African American Literary Awards. Author Sophia A. Nelson won the 2012 Champions of Diversity Award, given each year by diversity business executives in Fortune 100 companies.

Black Woman Redefined was inspired in part by what Nelson calls “open season on accomplished black women”: from Don Imus’s name-calling of black female basketball players in 2007 and a 2009 Yale University study titled “Marriage Eludes High-Achieving Black Women,” to the more recent revelation that First Lady Michelle Obama is concerned about being painted as an “angry, black woman.”

In Black Woman Redefined, Nelson sets out to change this cultural perception, taking readers on a no-holds-barred journey into the hearts and minds of accomplished black women to reveal truths, tribulations, and insights like never before.

This groundbreaking book provides black women of a new generation with essential career and life-coaching advice. Based on never-before-done research on college-educated, career-driven black women, Nelson offers her fellow “sisters”—and those who know, love, and work with them—a feel-good volume for personal and professional success that empowers them without tearing others down.

Singularity Rising
Surviving and Thriving in a Smarter, Richer, and More Dangerous World
JAMES D. MILLER

An economic expert provides possible global implications and advice on the rise of artificial intelligence

In Ray Kurzweil’s New York Times bestseller The Singularity Is Near, the futurist and entrepreneur describes the singularity, triggered by the tremendous growth of human and computing intelligence that is an almost inevitable outcome of Moore’s Law. Since the book’s publication, the coming of the singularity is now eagerly anticipated by many of the leading thinkers in Silicon Valley, from PayPal mastermind Peter Thiel to Google co-founder Larry Page. But what about the average person? How will the singularity affect our daily lives—our jobs, our families, and our wealth?

Singularity Rising focuses on the implications of a future society faced with an abundance of human and artificial intelligence. James D. Miller, an economics professor and popular speaker on the singularity, reveals how natural selection has been increasing human intelligence over the past few thousand years and speculates on how intelligence enhancements will shape civilization over the next 40 years.

Miller considers possible scenarios in this coming singularity, such as a merger of man and machine making society wealthy and nearly immortal; competition with billions of cheap AIs drive human wages to almost nothing while making investors rich; and drugs designed to fight Alzheimer’s disease and keep soldiers alert on battlefields having the fortunate side effect of increasing all of their users’ IQs.

Singularity Rising offers practical career and investment advice on how you can prepare and flourish in a singular environment.

JAMES D. MILLER is an associate professor of economics at Smith College and was a speaker at the 2008 Singularity Summit. He has a JD from Stanford where he was on Law Review and a PhD from the University of Chicago where his dissertation advisor was a Nobel Prize winner. He is a columnist for BetterInvesting Magazine and regularly wrote for CNBC.com during the tech bubble. The Singularity Institute called Miller’s work “important” and relevant to its core mission. Residence: South Deerfield, Mass.

Mironoff Piroshki
RECIPE COURTESY OF HELEN MIRREN

3 tbsp butter
½ c water or chicken stock
1 medium white cabbage, thinly sliced
2 leeks, thinly sliced
1 medium onion, chopped
2 refrigerated pie crusts
3 hard-boiled eggs, chopped
3 tbsp chopped parsley
Milk, for brushing the crust

Makes 6 to 8 pies

Our father was born in Russia, on the family estate called Kuryanova. The upheaval of the Russian Revolution and World War I left him and his parents living in London. In later years, his father came to live with us. Grandpa loved nothing better than to sit and tell his grandchildren tales of his life in Russia. We think that this version of piroshki must be from a recipe he told our mother; she adapted it, and these cabbage pies have been firm family favorites ever since. We know they are not authentic piroshki; but they are an original Mironoff Piroshki!

1. Preheat oven to 350°F.
2. Combine butter and water or stock in a large sauté pan and warm over medium-low heat. Add vegetables and cook, stirring occasionally, until vegetables soften, about 10 minutes. The cabbage should still have a bite. Remove from heat and set aside to cool.
3. On a floured surface, roll pie crusts out to a ¼-inch thickness. Cut into 6 (½-inch) circles and set aside.
4. Once the vegetables have cooled, drain, and place in a large bowl. Add eggs and parsley, and then season to taste. Stir to combine.
5. Divide vegetable filling evenly between the pastry circles, placing filling in center of each circle. Brush edges of crust with milk, then pinch edges together to seal pies together.
6. Place pies on lightly greased baking sheet. Lightly brush the tops of the pies with milk. Bake in preheated oven until golden brown, about 20 to 25 minutes.
The Cure for Alcoholism
The Medically Proven Way to Eliminate Alcohol Addiction
ROY ESKAPA, PhD

This book features the clinically proven and simple way to reverse alcoholism—without abstinence, detox, or rehab

Finally, there is a cure for alcoholism. This is the first step.

Featuring new and updated information and studies, including an introduction by actress Claudia Christian, the second edition of The Cure for Alcoholism delivers exactly what millions of alcoholics and families of alcoholics have been hoping for: a painless, dignified, and medically proven cure for their addiction. Backed by more than 70 clinical trials and research that extends back to 1964, The Sinclair Method deploys an opiate-blocking medication in a very specific way—in combination with ongoing drinking—to extinguish the addictive “software” in the brain. The de-addiction process rolls back the addictive mechanism in the brain to its original pre-addicted state—before the first drink was consumed, making this program an actual cure for alcoholism.

Drs. Roy Eskapa and David Sinclair of The Sinclair Method have put together a sound scientific book that proves that with this particular method, alcoholism can be cured in more than 75 percent of patients. What’s more, the treatment avoids the dangerous withdrawal symptoms, allowing patients to detox gradually and safely while they are still drinking. This removes the need for expensive and unpleasant inpatient rehabilitation programs. Actual drinking levels and cravings automatically decrease until control over alcohol is restored. Patients drink themselves sober according to a simple yet powerful process outlined in The Cure for Alcoholism.

The Cure for Alcoholism is a revolutionary book for anyone who wants to gain control over his or her drinking.

OF NOTE
- 1st edition sold 11,000+ copies
- 1st edition was featured in Newsweek, The Sunday Times, Niagara Magazine, and LIVESTRONG.com
- FDA-approved medication, naltrexone, that’s been clinically tested in more than 70 studies, has few side effects, and enjoys a success rate of around 80 percent of rehabilitating alcoholics
- Despite high failure rates, more than 3 million Americans receive some sort of treatment for alcoholism—spending more than $3.2 billion annually

Author ROY ESKAPA, PhD, is a clinical psychologist who has done pioneering research with naltrexone, uses it to treat patients in his private practice, and has worked closely with Dr. David Sinclair of The Sinclair Method on research into the causes and treatments for addiction. He also consults for and speaks to NGOs, government, health, and education organizations on Sinclair’s revolutionary cure for alcoholism and other addictions. Residence: London, England.

A harrowing story, *Babylon Confidential* follows Babylon 5’s Claudia Christian’s tailspin descent into alcoholism and her redemption as she overcomes it with The Sinclair Method.

**Excerpt from Babylon Confidential**

No one sets out to become an addict.

When you’re a kid and people ask you what you want to be when you grow up, you imagine yourself as a vet or a teacher (or if you’re 5-year-old me, as an actress or the dictator of a small country), something that involves helping people and making the world a better place. You never consider that one day you’ll find yourself sitting at a bus stop on Coldwater Canyon as the morning traffic passes by, hands shaking as you try to get the vodka-saturated orange juice past your lips. You don’t see yourself close to death in a rehab clinic with a total loss of muscle function, dehydrated, and hallucinating. No parent gives you advice on how to survive the long walk to the liquor store when the cupboard is dry, though you develop strategies. Rationing out sips of vanilla extract (35 percent alcohol) will keep the contents of your stomach down and your shaking legs from buckling under you.

You don’t see that coming; I sure didn’t when I followed my dream to pursue an acting career in Hollywood. I figured that running a petty dictatorship would be child’s play next to making ends meet as a working actress; I always liked a challenge. I’d left behind a family wrecked by a tragic loss, was betrayed by the people I loved most, and survived a horrific rape. By the time I was 18, I was working on shows like *Dallas* and *Falcon’s Crest* and earning a six-figure income. The Hollywood I found myself caught up in was a whirlwind of beauty, wealth, and power. I made out with stars like George Clooney, Kelly Le Brock, and Rob Lowe in the hottest clubs in L.A. and New York, knocked back with William Shatner, traveled the world on private jets and super-yachts with lovers like Dodi Fayed, and, in my breakthrough role as Commander Susan Ivanova on Babylon 5, found millions of fans. My life has been one of extremes. The bounty of love and encouragement from friends and fans is in sharp contrast to the unexpected mix of stalkings, shootings, and betrayals. I lived full-out, I wouldn’t have had it any other way, but there’s always a price to pay.
Will Hunter’s story ends with a bang in the action-packed final installment of Temple Mathews’s New Kid YA series

Things have never been darker for 16-year-old Will Hunter. He’s in no shape to stop the Dark Lord from finding and using the Sword of Armageddon—but if he can’t, he’s not the only one who will die.

The third book in the New Kid series takes Will and friends from a demon-infested island in the Puget Sound to the top of the Seattle Space Needle, where Will’s struggle against the Dark Lord ends in a confrontation that will determine the fate of all mankind.

But Now I See
My Journey from Blindness to Olympic Gold
STEVEN HOLCOMB WITH STEVE EUBANKS

A bobsled champion faces career-ending blindness, regains perfect sight with a breakthrough surgery, and wins gold in the 2010 Olympics

One of the top bobsledders in the world and leader of the four-man American team, Steven Holcomb had finished sixth in the 2006 Olympics and medaled in nearly every competition he entered. He was considered a strong gold contender for the 2010 Vancouver Olympic Games. Talented, aggressive, and fearless, he was at the top of his game. But Steven Holcomb had a dangerous secret. Steven Holcomb was going blind.

In the prime of his athletic career, he was diagnosed with Keratoconus—a degenerative disease affecting 1 in 1,000 and leaving 1 in 4 totally blind without a cornea transplant. In the world of competitive sports, it was a dream killer. Not a sport for the timid, bobsledding speeds approach 100 miles per hour through a series of hairpin turns. Serious injuries—even deaths—can result. But Holcomb kept his secret from his coach, sled mates, and the public for months and continued to drive the legendary sled Night Train.

When he finally told his coach, Holcomb was led to a revolutionary treatment, now the Holcomb C3-R. With his sight restored to 20/20, Holcomb became the first American in 50 years to win the International Bobsledding Federation World Championship, and the first American bobsledder since 1948 to win the Olympic gold medal.

But Now I See is the intimate portrait of a man’s pursuit of a dream, laced with humility and the faith to find a way when all seems hopeless. It’s about knowing anything is possible and the gift of a second chance.

RODNEY SAMPSON

• Promotion of free chapter to author's social networking site, EFactor.com, which has almost 1 million users, from 165 countries

Executives and entrepreneurs can succeed using the principles laid down by Martin Luther King Jr.

While most know of Dr. Martin Luther King Jr.'s sweeping dream of equality and freedom for all, what many do not realize is just how keenly focused he was on economic issues, particularly in his later years. Without economic opportunity, Dr. King often noted man “has neither life nor liberty nor the possibility for the pursuit of happiness. He merely exists.” It was, in fact, while planning the Poor People's March, a dramatic stand on economic issues, that his voice was forever silenced. In his final book, Dr. King posed the question, where do we go from here? The answer lies in Kingonomics, a 21st-century interpretation of his economic vision translated through the eyes of Dr. Rodney Sampson, a globally established economic innovator, business developer, and highly successful serial entrepreneur.

With 12 currencies (including service, innovation, and reciprocity), Sampson takes pertinent ideas from the life and works of Dr. King and, by combining them with real-life experiences, produces a guide through which one can realize their full potential and personal power. Success does not discriminate, and the road map to it is contained in the pages of this revolutionary new work.

What We Don’t Know
Rethinking the Science of Nutrition
T. COLIN CAMPBELL, PhD

It seemed to be the eternal question. What should we eat to optimize our nutrition and our health? In 2005, Dr. Colin Campbell’s The China Study answered this question definitively. Backed by the most extensive study of nutrition ever conducted and bolstered by dozens of additional studies and cases, The China Study gave us a simple but powerful answer: Eat a diet based on whole, plant-based food, and dramatically reduce your risk of a broad spectrum of diseases, including heart disease, obesity, diabetes, and cancer.

What We Don’t Know picks up where The China Study left off. The China Study revealed what we should eat and provided the powerful empirical support for this answer. What We Don’t Know answers the question of why. Why does a whole-food, plant-based diet provide optimal nutrition? What We Don’t Know demonstrates how far the scientific reductionism of the nutrition orthodoxy has gotten off-track and reveals the elegant wonders of the true wholistic workings of nutrition, from the cellular level to the operation of the entire organism. What We Don’t Know is a marvelous journey through cutting-edge thinking on nutrition, led by one of the masters of the science.

OF NOTE
- Dr. T. Colin Campbell is considered the foremost plant-based nutrition expert and has appeared in numerous national media, including The New York Times and Extra!
- Campbell’s previous book, The China Study, has sold more than 750,000 copies
- Dr. T. Colin Campbell was one of the doctors featured in the popular 2011 documentary Forks Over Knives

DR. T. COLIN CAMPBELL is Jacob Gould Schurman Professor Emeritus of Nutritional Biochemistry at Cornell University and author of the bestselling book, The China Study. He has received more than 70 grant-years of peer-reviewed research finding and authored more than 300 research papers. The China Study was the culmination of a 20-year partnership of Cornell University, Oxford University, and the Chinese Academy of Preventive Medicine. Residence: Ithaca, N.Y.
For the past 25 years, Windle Turley has traveled the world photographing wildlife, large and small. Orangutans in Borneo and gorillas in Africa, along with polar bears and butterflies, are only a few of the many subjects he has tracked. Exhibits of his works have been praised for their unique composition and character. When Turley is not taking pictures of wildlife, he is a practicing trial attorney. He lives in Dallas, Texas.

Even today, as trendy diets and a weight-loss frenzy sweep the nation, two-thirds of adults are still obese and children are being diagnosed with Type 2 diabetes, typically an “adult” disease, at an alarming rate. If we’re obsessed with being thin more so than ever before, why are Americans stricken with heart disease as much as we were 30 years ago?

In The China Study, Dr. T. Colin Campbell details the connection between nutrition and heart disease, diabetes, and cancer. The report also examines the source of nutritional confusion produced by powerful lobbies, government entities, and opportunistic scientists. The New York Times has recognized the study as the “Grand Prix of epidemiology” and the “most comprehensive large study ever undertaken of the relationship between diet and the risk of developing disease.”

The China Study is not a diet book. Dr. Campbell cuts through the haze of misinformation and delivers an insightful message to anyone living with cancer, diabetes, heart disease, obesity, and those concerned with the effects of aging.

For more than 40 years, DR. T. COLIN CAMPBELL has been at the forefront of nutrition research. His legacy, the China Study, is the most comprehensive study of health and nutrition ever conducted. Residence: Ithaca, N.Y.

A 1999 graduate of Cornell University and recipient of a medical degree in 2010, THOMAS M. CAMPBELL, MD, is a writer, actor, and four-time marathon runner. Residence: Ithaca, N.Y.
Prior to his pick-up work, MEHOW worked in the computer field, first with his own small company and later for larger companies. Despite a comfortable lifestyle, he became frustrated with his lack of a social life. In 2006, he discovered the seduction world through attending a “bootcamp” taught by Mystery, at that time the most famous pick-up artist in the world. He began to coach for Mystery’s company and then formed his own company, Mehow, Inc., in 2007 and developed one of the top-producing websites in the seduction business, which is also a marketing model for many sites outside the business. Mehow has become one of the most well-known and sought-after pick-up artists in the world. Residence: Los Angeles, Calif.

V. ARROW graduated from Knox College in 2008 with degrees in history and creative writing, specializing in 20th-century pop culture and young adult lit. Under another name, she has previously published at Pop Matters, The One Love, Tommy2.net, and The Hollywood Reporter. Arrow has read a book a day for the last 22 years, and grew up to the age of 12 without
realizing that the Muppets weren’t living creatures. She believes that pop culture affects, reflects, and informs all aspects of daily life in Western culture and that it is perhaps the most crucial form of media expression to analyze and discuss.

Excerpt from *The Panem Companion*

Every name in the Hunger Games series plays a significant role in characterization, either through revealing further untold backstory or foreshadowing the character’s final resolution of the series. The Capitol characters’ names relate to their real-world historical parallels in the ruling or fall of Imperial Rome, like Cinna, while District-born characters’ names are reminiscent of their home’s Specialty, like Thresh, both the strong and deadly District 11 Tribute of the 74th Games and a lethal, efficient aspect of agricultural cultivation (to thresh is to beat grain from its stalks; a thresher is a highly dangerous farming machine).

The Hunger Games series is, like all war stories, one person’s journey. And like all works written in first-person, it presents us, the readers, with one character’s version of Panem. However, due to Suzanne Collins’ extraordinary attention to detail and skill with historical, scientific, and literary allusion, the books also tell dozens of further, deeper stories about the Second Rebellion and fall of the Capitol than meets the eye. Embedded in its characters’ names are personal histories, motivations for rebellion, and connections between the page and our world that make the Hunger Games grow from an enjoyable reading experience to a rich, thought-provoking analysis of the contemporary Western world.

And, from a fangirl’s perspective, more entertaining, as well! After all, who wouldn’t be inspired by learning that Woof’s name may come not from the sound a dog makes, but the crossthreads of a loom, which ties to his home in District 8?

Orson Scott Card's *Ender's Game* is a classic of science fiction. Though it began its life as a short story, it was later expanded into a Hugo and Nebula award-winning novel, served as a springboard for a much larger universe of stories, and finally, in March 2013, will become a feature film.

*Ender's World* conscripts almost two dozen writers of science fiction, fantasy, and young adult books to offer new perspectives on the 1985 novel, along with insights gleaned from other Ender stories that fit within the *Ender's Game* chronology, including *Ender in Exile* and *Ender's Shadow*. In addition, military strategists Colonel Tom Ruby and Captain John Schmitt offer insight into the human-Formic war. Contributions from Aaron Johnson, the coauthor of the Formic Wars prequel novels, and Jake Black, the coauthor of *The Authorized Ender Companion*, are also included.

The collection's insightful analyses and moving personal essays are rounded out with short pieces answering more technically oriented questions about the Ender universe, including: *Why is the Battle Room a cube?* and *Why did the military recruit their soldiers as children?*

Edited by Orson Scott Card himself, who also provides an introduction to the anthology as well as to the individual essays, *Ender's World* is aimed both at readers who have kept up with the many books that came after and at those who have not, but who loved and want to revisit the original novel.

Exploring George R. R. Martin’s A Song of Ice and Fire, From A Game of Thrones to A Dance with Dragons
EDITED BY JAMES LOWDER
The world created by George R.R. Martin in his high fantasy series A Song of Ice and Fire—now the basis for the hit HBO series Game of Thrones—is not only richly drawn, but also immensely popular. By A Game of Thrones’ debut in May 2011, the series already had more than 6 million copies in print in the US and had sold more than 16 million worldwide. Beyond the Wall explores the book series’ influences, its place in the fantasy pantheon, its challenging narrative choices, and the pull of its stunningly epic scope.
